Professional Summary

Dynamic Full-Stack Developer and technical leader pursuing a B.Sc. in Computer Science with hands-on experience in building scalable, user-friendly applications. Currently serving as Lead Developer for emerging startups, combining a strong foundation in data structures, algorithms, and Agile methodologies with practical leadership. Proficient in modern web frameworks and passionate about continuous learning, AI integration, and driving innovative technology solutions from concept to deployment.

Experience & Leadership

Lead Developer | [Tarisai](#)

- Direct the overarching technical strategy and oversee the development of scalable architectural solutions to support startup growth and product deployment.

Co-Founder and Lead Developer | [Elevate Value Partners](#)

- Lead cross-functional technical initiatives, driving product engineering and aligning the technology stack with core business and financial objectives.

Google Developer Student Club (GDSC) Lead | Africa University

- Organize and facilitate technical workshops, manage club web properties, define team roles, and mentor fellow students in building professional development portfolios.

Education

Africa University | Mutare, Zimbabwe

Bachelor of Science Honours in Computer Science | Aug 2024 - Jun 2028

- Academic Standing: GPA: 3.78 (Dean's List) | CGPA: 3.52
- Relevant Coursework: Operating Systems, Human and Computer Interactions, Network Security, Object-Oriented Programming (OOP), Theory of Computing, Digital Electronics.

Projects

Sentari Seven (<https://sentari-seven.vercel.app/>): Engineered and deployed a modern web application, focusing on seamless user experience, secure performance, and responsive frontend design.

Kwikifund (May 2025 - Present): Developed a mobile-first financing platform utilizing AI credit scoring, USSD, and digital wallets to provide microloans, BNPL, and financial tools to underserved users across Africa.

AI-Powered Email and Job Automation Agent (Aug 2025 - Present): Integrated an AI model to prioritize incoming

emails and send high-priority alerts via a WhatsApp API integration. Automated web scraping across job boards and composed personalized application emails to ensure early candidate submission.

ChefMuse: Created an AI-powered recipe suggestion web application hosted on GitHub Pages that provides step-by-step text instructions based on user-available ingredients and kitchen tools.

UPath (SecureScan): Built a comprehensive university portal simulation featuring QR-based attendance tracking, campus navigation mapping, and secure database architecture.

GyMPal: Developed a minimalistic dark-themed Progressive Web App (PWA) to track long-term fitness routines and calisthenics workout logic.

Skills

Programming Languages: Python, JavaScript, TypeScript, AI/Machine Learning, NLP.

Web Technologies: React, React Native, Node.js, Bootstrap, Mobile Application Development, REST APIs, Web Scraping, PWA deployment.

Databases: MongoDB, SQL.

Tools & Methodologies: GitHub, Git, Postman API, Agile, Collaborative Coding, Linux environments (Fedora/Arch).

Core Competencies: FinTech, Cybersecurity, Algorithms, Active Learning, Technical Leadership.

Certifications & Professional Development

ISC2 Candidate: Engaged in continuous professional development and training through ISC2, demonstrating a strong commitment to pursuing a career in cybersecurity.
